

The new Audi

A3

A3

Sportback

The new Audi A3 Sportback* comes with expressive wheel arches, a wider track and a continuous shoulder line on the side. In conjunction with the new, enlarged Audi Singleframe in honeycomb look, the Audi A3 Sportback* looks more athletic than ever before.

The new Audi A3 Sportback*

Sporty yet highly digitalised: The Audi A3 Sportback* has made great progress. From the outside, it looks athletic, which is underscored by its unmistakable quattro architecture. Its interior is dynamic – while also full of technical features, such as the MMI touch display, MMI radio, 10.25-inch Audi Virtual Cockpit and rear parking camera.

More space

With 380 l of luggage capacity and convenient equipment to help with loading and unloading, the new Audi A3 Sportback* is practical and roomy. Extra head and elbow room at the front and rear provide even greater comfort and functionality.

The new Audi A3 Sedan*

The new Audi A3 Sedan* comes with its sporty, stylish exterior, gloss styling and Integrated tailpipes in rear bumper, driver-oriented interior. That's progress you can feel.

Turn night into day: LED headlights

The standard LED headlights* illuminate the road brightly and evenly ensuring good visibility. They are also recognisable by their unique Audi light signature.

Explanatory note

- * Empty vehicle weight includes driver (75 kg) and fuel tank 90% full, calculated in accordance with the current Regulation (EU) 1230/2012. Optional equipment may increase the car's empty weight and drag coefficient, whereupon the possible payload and the top speed will be reduced accordingly.
- *** The specified fuel consumption and emission data have been determined according to the measurement procedure prescribed by law. Since 1 September, 2017, certain new vehicles are already being type-approved according to the Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test procedure for measuring fuel consumption and CO₂ emissions. Starting on 1 September, 2018, the New European Driving Cycle (NEDC) will be replaced by the WLTP in stages. Owing to the more realistic test conditions, the fuel consumption and CO₂ emission measured according to the WLTP will, in many cases, be higher than those measured according to the NEDC.
- ** We recommend using super sulfur-free unleaded RON 95 fuel in complying with DIN EN 228. If this is not available, use regular sulfur-free unleaded RON 91 fuel complying with DIN EN 228, power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10% (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel complying with 692/2008/ EC.
- We are currently still required by law to state the NEDC figures. In the case of new vehicles which have been type-approved according to the WLTP, the NEDC figures are derived from the WLTP data. It is possible to specify the WLTP figures voluntarily in addition until such time as this is required by law. In cases where the NEDC figures are specified as value ranges, these do not refer to a particular individual vehicle and do not constitute part of the sales offering. They are intended exclusively as a means of comparison between different vehicle types.
- Additional equipment and accessories (e. g. add-on parts, different tyre formats, etc.) may change the relevant vehicle parameters, such as weight, rolling resistance and aerodynamics, and, in conjunction with weather and traffic conditions and individual driving style, may affect fuel consumption, electrical power consumption, CO₂ emissions and the performance figures for the vehicle.
